

# PROTECT-CH

Prophylactic Therapy in Care Homes Trial

WELCOME !!!

## WELCOME TO THE 1ST EDITION OF THE PROTECT-CH CARE HOME NEWSLETTER

First of all, thank you for expressing an interest in being part of the **PROTECT-CH** trial, with your help we plan to test different treatments that can protect care home residents from developing Covid-19.

Most of you should already have had a conversation with someone from our team, thank you for the information you have provided. Before we can start the trial we need to have approval from the UK medicines regulator and also an independent research ethics committee. They are currently reviewing the trial and all the documentation and once they have given their approval we will be in touch to explain the next steps. In the meantime, do not hesitate to contact us if you have any questions.

## THE ROLE OF YOUR CARE HOME GP(S)

GPs will be required to perform a medical check and confirm they are happy for each resident to take part in the trial. We are in the process of contacting your GPs to ask if they are willing to take part in the trial. If you have not yet provided your GP contact details please provide them to us.

## DROP-IN SESSIONS

From the 29th April we are holding regular drop-in sessions to provide an update on the trial and also give you the opportunity to ask any questions you may have. Joining details are available on the trial website.
